

I am an XM Radio subscriber along with my family. We have two radios and are planning on getting a third. We have found it to be the most significant breakthrough in entertainment in years. It is my understanding the the NBA is pushing you to put limits on what XM proviedes. We believe this to be a breach of the constitution in the area of freedom of speech as well as the concept of a free market place. These two priniciples are what helps make our nation great. Please do not limit my opportunity for choices in the market place because a few see this as a true competitive product. Sincerely, W.M. Gray IV. A very satisfied XM customer and voter!!!
